

How Do I Make Specific Content Unavailable to Students?

An instructor can make a piece of course content unavailable or return it to its available status as follows:

1. Turn editing on.
2. Look for the icon of the Eye.
3. If it is open the item is visible. If it is closed it is not visible to the viewer.
4. Click on the icon to change its visibility status.
5. Regardless of the setting, the instructor will always be able to view the item and edit it

The eye icon is also visible to the right of any course topic section. You can hide and entire course section by selecting this icon.
