How Do I Make My Course Temporarily Unavailable to Students?

An instructor can make a course unavailable or return it to its available status as follows:

- 1. Administration Block
- 2. Settings
- 3. Availability
- 4. Select which one applies
- 5. Save changes

It is strongly recommended that if you choose to do this immediately inform your students that the course will be temporarily unavailable to prevent confusion and calls to the Service desk or registrar wondering why they are no longer enrolled.

You may also choose to do this if you have consolidated course sections and wish to direct all students to one course. Hiding the unused course will make this arrangement less confusing to students.
