

Money for Graduate Students

Scholarships for graduate students are much less common than scholarships

for undergraduate students but they are out there. If you distinguish yourself in college by getting involved on campus, participating in your community, and earning the grades that match your social contributions, getting assistance for graduate school is not as hard as it seems. The competition is tough when financial aid is at stake, but there are also fewer students vying for the prize. If graduate school will help you obtain the position that you want, boost your salary, and build your qualifications, by all means, pursue a master's degree fervently and seek out scholarship opportunities.

This brochure is designed to help Nazareth College students find scholarships, fellowships and grants to help offset the cost of their education.
